LEADERSHIP

Dr. Dmytro Klokol
MD, GCP, PHD

HEAD OF MEDICAL ADVISORY BOARD

“We believe in implementing a ‘guest-centered’ approach rather than ‘disease-centered’ approach to treatment.”

The frequency of malignancies, autoimmune diseases, congenital and degenerative disorders are reportedly increasing. This also includes autism, allergies, asthma and metabolic disorders such as diabetes.

This is because we live in a highly polluted and toxic environment. Unfortunately at times, conventional medicine fails to adequately address these challenges with drugs and antibiotics becoming redundant, and the prevalence of most chronic health problems continuing to rise.

EUROPEAN WELLNESS™ presents a holistic biological wellness offering to assess, prevent and manage various health issues and pathological conditions.

We recognize that disease is heralded by subtle functional deterioration of one or more of the body systems. Therefore, powerful anti-aging particles are implemented to slow down and reverse structural and functional degradation of tissue in organs.

Restoring one's health means reversing the particular dysfunction link to the disease and aging which is often caused by lifelong contact with toxins, poor diet and lifestyle choices along with genetic predispositions.

EUROPEAN WELLNESS™ implements practical models for obtaining and evaluating the clinical information which results in individualized therapies.

We emphasize on restoring the balance of the entire system by supporting fundamental physiological processes, recovering at cellular level and amending environmental and lifestyle impacts.

This results in therapies that focus on general rejuvenation, revitalization and restoring health and function, rather than simply managing symptoms.

Our practitioners understand that each guest we serve is unique and based on their individual genetic and environmental peculiarities.

Dr. Wolfram Bosco F. Zolk

MED. DENT

MEDICAL DIRECTOR

“In order to guarantee good results, all energy systems must work correctly. The matter and field structure must be able to interact in its physiological range without negative interference.”

Lifestyle choices and daily habits have an impact on oral health. Although the latest techniques to cure bone, gums and teeth are sound, unexplainable problems often occur despite correct treatment. This in turn leads to illnesses in other parts of the body.

Modern medicine has a tendency to focus on details and by doing so, results in missing the whole or 'One' picture.

However, holistic principles dictate that everything is connected with everything else. Holistic refers to addressing the whole-body by treating the cause of the problem and not just the symptoms that manifest in a particular area.

Biological (holistic) medicine and dentistry in analysis, diagnosis and therapy are based on the respect of the molecule or field resonance phenomenon in and between living systems and matter.

Each influence albeit conscious, emotional and material level is in positive resonance, if the impact doesn't create a negative answer in a living system, nor in a local or systemic context.

In every wellness treatment, the oral body correlation is studied. With specific diagnostic tools and processes as well as a panoramic dental x-ray, we search for clues to reveal underlying disease or conditions.

Biological treatments respect the existing environment as the base for each successful therapy. A healthy environment must be free of toxins, deposits and highly reactive materials.

In order to guarantee good results, all energy systems must work correctly. The matter and field structure must be able to interact in its physiological range without negative interference.

The rejuvenation process stimulates the cellular metabolism to restart in it's individual physiological way. The state of illness will be cured and change into a state of wellness which is why a holistic approach to dentistry is invaluable.

Welcome to the holistic and natural biological wellness paradigm. Our EUROPEAN WELLNESS™ teams around the world are proud to serve you as a guest, not just a patient.

ABOUT

EWC INTERNATIONAL™'s primary resolve is the development of biological wellness protocols, structures and systems as well as to promote research to enable the functional role of licensed EUROPEAN WELLNESS™ CENTERS across the world. It is the parent company of the group and trades as EWC INTERNATIONAL™.

EWC INTERNATIONAL™ holds the group intellectual property, systems and EUROPEAN WELLNESS™, EUROPEAN WELLNESS CENTER™, EUROPEAN WELLNESS ACADEMIE™ and EUROPEAN WELLNESS SHOWCASE™ brands.

MISSION & VISION

EUROPEAN WELLNESS™ is a holistic wellness and rejuvenation concept based on the knowledge and effectiveness of Biological Medicine and bio-molecular therapy.

We strive to guide local communities in acquiring lasting wellness and an enriched quality of life by best practice service delivery.

Guests are offered holistic solutions for anti-aging, aesthetic and whole-life health management.

Our practitioners confidently follow group certification in world-leading biological medicine and therapy techniques based on successful and tested clinical practice.

The EUROPEAN WELLNESS ACADEMIE™ is established as an education, training and empowerment organization to appropriately support and serve the group. It is the foundation on which EUROPEAN WELLNESS™ global aspirations grow.

The académie delivers training modules in wellness center service, operational leadership, customer service excellence, industry principles and specific training modules for the groups' proprietary diagnose, detox, repair and rejuvenate programs.

EUROPEAN WELLNESS CENTER™ is the premium accreditation – an earned badge of endorsement – applied to locally, licensed centers and their practitioners who meet the standards necessary to apply for the EUROPEAN WELLNESS™ treatment protocols and methodology.

Its vision is to integrate personalised holistic wellness treatment services customised for innate healing using the principles of biological wellness, in a secure, ultra-exclusive and private setting.

The first EUROPEAN WELLNESS CENTER™ introduced to market are wholly owned by EWC INTERNATIONAL™.

The EUROPEAN WELLNESS SHOWCASE™ showcases specific equipment and devices that are unique to our biological wellness paradigm.

They have been brought together and assembled as the EUROPEAN WELLNESS SHOWCASE™ where partners and potential licensees can witness a virtual CENTER in a practical sense. This removes the challenge of experiencing the concept without interfering with Guest treatments and therapies.

FOUR PILLARS

These are the four pillars that form the clinical strength of EUROPEAN WELLNESS™.

STEP 1 DIAGNOSIS

To begin treatment, it is vital to determine the underlying cause of disease and the real conditional state of each patient. This is achieved through lengthy wellness assessment,

non-invasive clinical onsite testing as well as offsite pathology and laboratory tests.

- Bio Medi Pulse
- Bio EAV
- Bio Med Scan
- OG Scan (Heavy Metal Scanning)
- Mamo Radio-thermo Scan (Advanced Non-radiation Breast Scanning)
- Radio Thermo Scan for liver / kidney /other parts of inflammation
- Dark & Bright Field Microscopy and Vascular Scan

- Other Proprietary Check-up optionals:
 - DNA Gene Testing
 - Food Intolerance
 - Cancer & Life Span Profiling

STEP 2 DETOXIFICATION

Cleansing the body of heavy metals and other toxic substances has many benefits. This includes improving our energy levels and activating our metabolism, while

boosting the efficiency of the body's natural defences.

A consistent detoxification process remedies the adverse effects of stress in our body and improves the action of Repair and Rejuvenate therapies.

The detox protocol may include Phytotherapy, Chelation, Plaquex Infusion and Colon Hydrotherapy.

- Plaqx Therapy
- Proprietary Chelation Therapy
- Colon Hydrotherapy
- Infrared Sauna Detoxification (USA)
- Advanced Therapy
- Other Proprietary Modalities

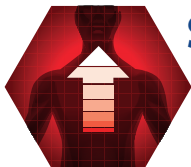

STEP 3 REPAIR

After the detoxification stage, a repair protocol is implemented to help enhance the body's natural defence and healing capacity for long-lasting wellness. EUROPEAN WELLNESS™

combines several methods to repair a patient's immune system, strengthen the intestinal system, enhance blood circulation, and reinforce other physiological processes to restore the body's internal balance.

- Ozone Dialysis Therapy (MedOzon Therapy)
- Arthritic / Joints Pain / Rheumatism Therapy
- Bio Magnetic Field Therapy
- Systemic Hyperthermia
- Hyperbaric Oxygen Chamber Therapy
- Pituitary Gland Therapy
- Hormonal Imbalances Therapy
- Sleep & Destress Induction Therapy
- Multi Bio Lux Crystal Fusion Light & Gem
- Harmonising Therapy
- Spleen Therapy
- Cancer / Tumour Prevention Vaccine (GCMAF with HMW HA – High Molecular Weight Hyaluronic Acid)
- Other Proprietary Modalities

STEP 4 REJUVENATION

The stages of rejuvenation involves a range of individualized treatment prescribed to stimulate the body's cellular renewal process ranging from oral rejuvenating supplements,

bioactive anti-oxidants to the most advanced bio molecular peptide therapies.

- Bio Molecular/Cellular Therapy

SPECIALISED PROGRAMS

EUROPEAN WELLNESS™ offers specialised packages of treatment therapies for specific guest challenges. All are individualized based on the Guest's age, condition and overall diagnosis.

HORMONAL THERAPIES

Our unique bio-hormonal revitalisation program provides complementary treatment for premature menopause and andropause. The main principle of this therapy is hormone-free modulation of endogenous endocrine function using a combination of safe non-invasive procedures.

PAIN MANAGEMENT THERAPY

Based on scientifically proven methods and natural therapies, a drug free approach to pain is implemented. Our efforts are used to influence core physiological factors of chronic inflammation and tissue damage. This also includes identifying and repairing blockages of energy pathways through the body.

SLEEP QUALITY

Difficulty in falling or staying asleep can affect all aspects of daily lives. Clearly recognizing the underlying pathophysiology of sleep, we have developed profound solutions to manifest regular sound sleep.

SPORT THERAPY

Working with sports scientists, we help champions move faster, harder and stronger without drugs. Be it strength or endurance sports, we can determine the best holistic support for performance enhancement or recovery. This is in line with the World Anti-Doping Authority regulations.

STRESS RELIEF THERAPY

People experience stress in varying forms and degrees everyday. To some, it can be a positive force, while others - a debilitating feeling. Hence, treatments and therapies are individualized through our unshakeable holistic de-stress response provisions.

SMOKING CESSATION

Understandably a hard habit to break. Therefore, our specialist programs can be used to reduce damage inflicted on guest's vital organs comprising lungs heart and brain as well as blood and circulation.

WEIGHT MANAGEMENT

Using a fusion of nutritiology, metabolic medicine and non-medicinal non-invasive fat burning procedures, our program assists in increasing metabolic rate. This in turn channels from fat deposition to muscle strengthening.

Good Nutrition is imperative in health promotion and disease prevention. Most common illnesses can be caused by intolerance to certain food, bad nutrition and toxic influences. Metabolic changes such as hypertonia, obesity, joint and intestinal problems or neurological diseases and cancer are closely related to nutrition.

EUROPEAN WELLNESS™ applies modern methods to examine the health of intestinal flora and existence of nutritional allergies. We will analyze your nutrition condition and provide simple measures for healthy living.

LOCATIONS

**SWISS
WELLNESS
CENTER**

SWISS WELLNESS CENTER™

Lugano, Switzerland | www.swisswellness.com

Swiss Wellness Center is the flagship EUROPEAN WELLNESS CENTER™ and centrally located in the Italian-speaking city of Lugano.
